# Lettrè de Salûs

## Faculty of Health Sciences

Vol: 1, Issue 1, May 2012

Dear Readers,

With the grace of Almighty God, it is our great pleasure to present the first e-newsletter “Lettrè de Salûs” of Faculty of Health Sciences. We have chosen its name as “Lettrè de Salûs” which means letter of health and safety. We would like to convey our sincere thanks to our Hon’ble Vice Chancellor, The Most Rev. Prof. (Dr.) R.B. Lal, Pro Vice-chancellor (Administration), Prof (Dr.) S.B. Lal and Pro Vice Chancellor (Academic Affairs) Prof. (Dr.) Newman Fernandes for endowing us the platform to formulate our first e-news letter. The first issue of the “Lettrè de Salûs”, a quarterly publication, presenting you the latest updates of health issues around the world on, especially the activities in Faculty of Health Sciences.

In recent decades the entire world has been confronting with various lifestyles related medical problems of health for instance obesity, diabetes, cancer and cardiac diseases and others. Our endeavor should be to provide various measures for the maximum benefit to the people as there are many segments of the society in India, which go unnoticed and need immediate attention. Another significant area which needs maximum attention is that of the poor and downtrodden, which is driven by lack of basic needs of life for example food security, health security, education security and infrastructure.

Faculty of Health Sciences is working with the main objective of not only to fabricate the highly talented and potential students but also to support the mankind by generating the new inventions in research which will facilitate the Post-graduate and doctoral students to achieve the above objectives. To shore up this, development of new chemical entities as well as herbal products is in its initial stage.

We hope that our “Lettrè de Salûs” will enrich with knowledge to its potential readers to learn more about our work, how to get involved and provide feedback, as well as give encouragement to find out more about what can be done to nationally and locally for the betterment of society’s health and safety.

With thanks.
